Expense Management, Simplified

Save time from swipe through reconciliation

The expense experience employees want with the visibility, flexibility, and control you need. Simple, fast, and in real time.

Spend

Swipe CenterCard and use the mobile app to capture details on the go. Push notifications prompt spenders to snap photos of receipts. Real-time review and submission is enabled via automatically coded expense details such as vendor or cost center.

Approve

Quickly and easily approve expenses. Scan for out-of-policy expenses and contact spenders as needed, ensuring policy compliance. Customizable approval workflows mean you only need to look at the expenses that matter to you.

Review

Eliminate surprises and see real-time employee spend—including unsubmitted expenses—all in one place. No more month-end accruals. Intelligent software audits 100% of expenses to improve reporting accuracy and policy compliance.

Analyze

See top-level trends or analyze the details. Track spend across projects, analyze costs, and report results and trends.
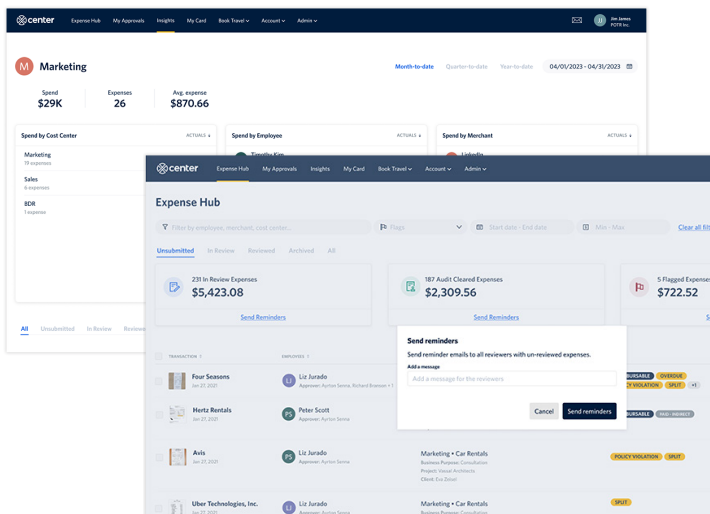

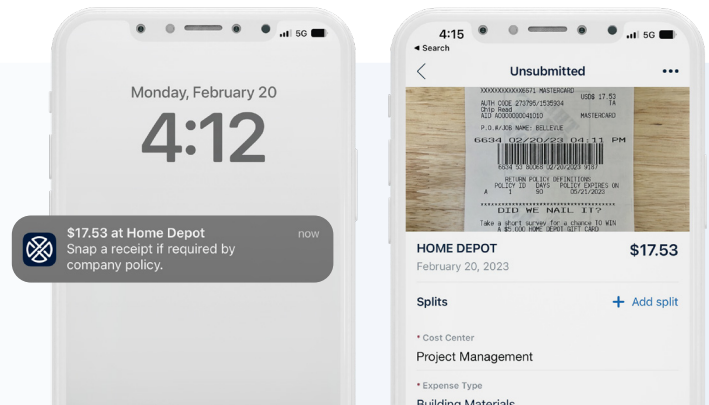

Simple for Spenders, Powerful for Finance Teams

Swipe, Snap, Done
After a purchase is made, expense details like vendor, amount, and expense type are coded automatically. Spenders can review and submit in real time with minimal effort.

Built-in Flexibility to Power Your Business
Configurable software makes it easy for spenders and expense managers. Capture the information you need with custom expense fields.

Approval Rules Built for You, by You
Make your business more efficient with multi-level and multi-attribute approval rules to simplify expense management. Focus on the expense criteria that matter most to your business, such as department, project, job, or amount. Set policies to dynamically route approvals and enable easy auditing.

Follow-Up Made Easy
Need someone to submit a report or have a question that needs to be addressed? Alleviate the burden on finance and send reminders with a click.
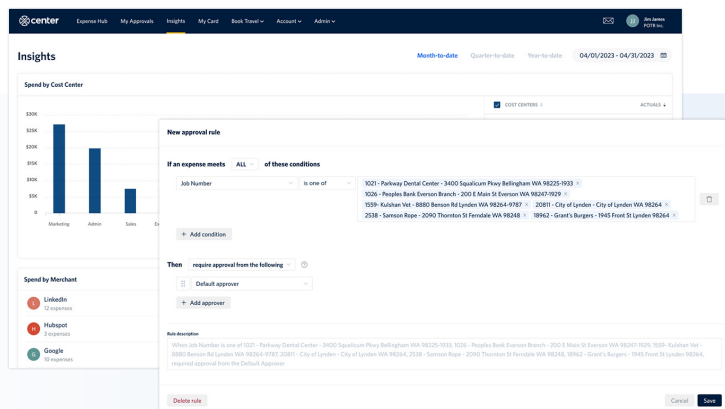

Close the Books Faster
Easily spot out-of-policy spend. Quickly audit, post, and reconcile expenses with just a few clicks, saving time at month-end. On average, our customers reduce time spent posting expenses by more than 94%.

Insights Powered by Real-time Reporting
See spend as it happens. Review trends and compliance with budget owners and executives.

Streamlined Accounting Integrations
Export all expenses with a click of a button via customized .csv or integrate directly with your accounting software/ERP.
